

SMART CO₂ FREE HEATER

SmartHeater® mobile heating unit

Efficient low cost construction heating

Zero emission

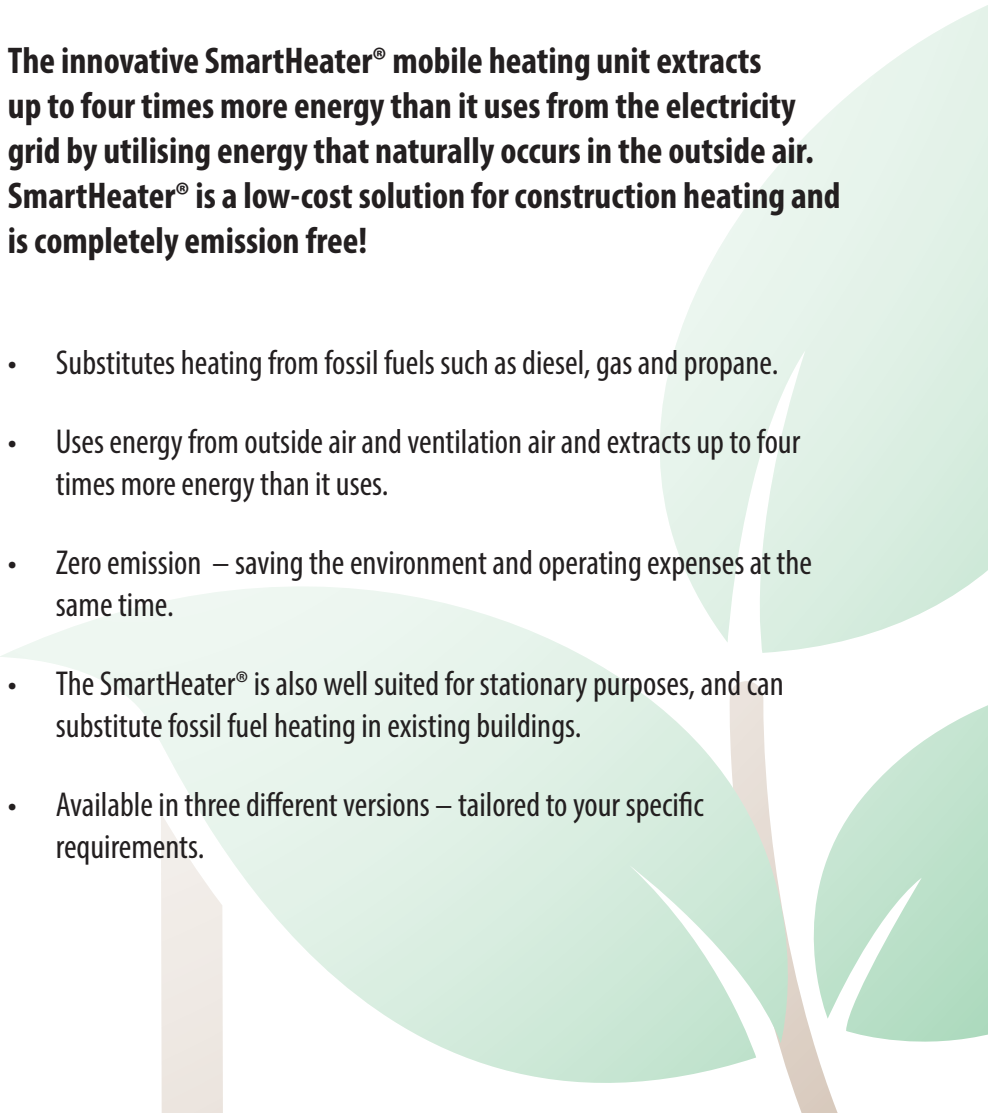

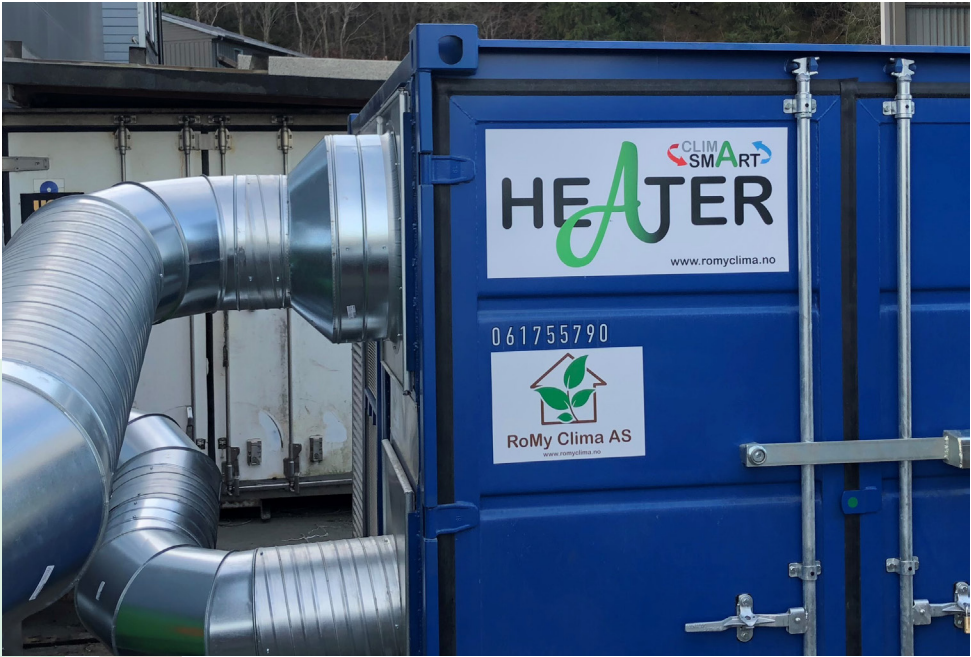

Renewable technology is our great passion!

www.romyclima.no

Why choose the SmartHeater®?

The innovative SmartHeater® mobile heating unit extracts up to four times more energy than it uses from the electricity grid by utilising energy that naturally occurs in the outside air. SmartHeater® is a low-cost solution for construction heating and is completely emission free!

- Substitutes heating from fossil fuels such as diesel, gas and propane.
 - Uses energy from outside air and ventilation air and extracts up to four times more energy than it uses.
 - Zero emission – saving the environment and operating expenses at the same time.
 - The SmartHeater® is also well suited for stationary purposes, and can substitute fossil fuel heating in existing buildings.
 - Available in three different versions – tailored to your specific requirements.
-
